

# Release Plan

**Heading:** Release Plan, StorageMate, StorageMate Web App, 01/21/18, Revision #1

**High Level Goals:** Create a functional web application (safari, chrome, etc...). The starting point is to set up the environment and get familiar with the new technologies required to make the website app. Designing a nice UI where users can manage their devices would be an essential part of the website. Additionally, storing user credentials securely is a top priority.

## User Stories for Release:

- **Sprint 1**
  - As a developer, I want to learn all the new technologies. (13 points)
  - As a developer, I want to set up the programming environment. (3 points)
  - As a developer, I want to have a burn-up chart, scrum board, release plan, and sprint plan. (3 points)
- **Sprint 2**
  - As a user, I want to have buttons in order to navigate through the website. (8 points)
  - As a user, I want to have a functional user authenticating system. (8 points)
  - As a user, I want to see different layouts (homepage, and posting page). (5 points)
- **Sprint 3**
  - As a user, I want to be able to upload a picture of my storage space (available) so potential customers can see it on the web application. (15 points)
  - As I user, I want an easy and simple to use UI that is also aesthetically pleasing. (5 points)
- **Sprint 4**
  - As a developer, I want to have unit tests that ensure that my code will not break. (15 points)
  - As a developer, I want my site to be fully functional, and have no bugs. (8 points)
  - As a user, I want to receive notifications or notes from people interested in my storage space. (13 points)

## Product Backlog:

- As a developer, I want to implement a payment feature, so the renter can pay the storage owner. I want to implement something similar to Paypal or Venmo (API).
