

# Sprint 2 Plan

**Heading:** Sprint 2 Plan, StorageMate, StorageMate WebApp, 02/05/18

**Goal:** Build an website template with (Javascript, CSS, Python, and HTML). Start creating user authentication, and time stamp listings.

## Task Listing:

User Story 1: As a user be able to traverse the site to different pages:

- As a user, I want to have buttons in order to navigate through the website. (8 points)
- As a user, I want to see different layouts (homepage, and posting page). (5 points)

User Story 2: As a developer I want to store user information, post-time and a login information.

- As a developer, I want to have a functional user authenticating system. (8 points)
- As a user, I want to be able to see what time a posting was posted. (5 points)

Total for User Story 1: **30 hours**

## Team Roles:

- Justin Cheon: Product Owner
- Mai Linh Ngo (Lawrence): Team Member
- Ji-Woo Kim: Scrum Master
